

Alphen aan den Rijn

In Alphen aan den Rijn, we have a lot of ways how we recycle materials.

1. Separate our trash:

At home we have different Rubbishbins for different types of trash that's how we separate our trash so it can be recycled. The trash workers pick it up and then they work further on the recycling.

2. Deposit on bottles:

When we buy a bottle or cans, we have to pay more for it, because the package is from plastic. Then we bring it back to store, and we get, the money we paid extra, back. Because the plastic can than be used for other things. (Recycling).

3. Thriftstore:

In Alphen aan den Rijn we have thriftstores. You can bring your old, but reusable stuff there, so other people can buy it. It's an easy way to reuse stuff.

4. Clothes containers:

In the Netherlands we have green containers on the street. In those containers you can throw your old clothes or clothes that you do not fit anymore, then it can be used for people who need it in the Netherlands or it will be send abroad where people can use it. So the clothes could be recycled.

5. Waste collection place:

We also have a place where you can bring your old not reusable stuff, you can bring an old closet or something like that. Then you need to throw it away in the container that's special for that material. It is an easy way to recycle.

Istanbul

Common Points in Recycling

Alphen aan den Rijn & Istanbul

1. Waste is Separated at the Source

Separate Recycling Bins for
Paper, Glass, Plastic & Metal

Ayvi
Gerçekleştiren
Auluları

Same concept, different countries.

2. Municipalities Take Active Role

Managed and
Collected by
Municipal
Authorities

3. Public Participation is Vital

Education and
Awareness
Campaigns

4. Education and Awareness

Environmental
Lessons and
Campaigns

5. Goal: A Cleaner Future

For a Sustainable World

CONCLUSION

Alphen aan den Rijn & Istanbul share largely the same recycling principles, even from different countries.

"Small steps create big changes."

This is the poster made by the turkish students.

Conclusion

Our conclusion is that there aren't a lot of differences between Alphen and Istanbul when it comes to recycling. We've discovered that the things we do in Alphen aan den Rijn are also recycle technics used in Istanbul. We thought that in Istanbul there would be more litter, because the city is way bigger and there are living a lot more people. Also we thought that the people in Istanbul do less about recycling, but we have come to the conclusion that that isn't true and that we do most of the things the same way so far as we know.
